## 1.2 Over-all Performance

The Company was incorporated under the provisions of the Business Corporations Act (British Columbia) on February 1, 2006.

The Company is a capital pool company pursuant to the policies of the TSX Venture Exchange (“Exchange”). The Company is in the development stage and its principal business is the identification and evaluation of assets or businesses with a view to completing a Qualifying Transaction as defined by the rules of the Exchange. Such a transaction will be subject to shareholder and regulatory approvals.

On November 30, 2006, the Company completed its initial public offering (“IPO”) of 5,000,000 common shares at \$0.20 per share for gross proceeds of \$1,000,000. The agent received a commission of 10% of the gross proceeds of the offering or \$0.02 per share and an administration fee of \$10,000. The Company also granted the agent non-transferable options (“agent’s options”) to acquire up to 500,000 common shares at an exercise price of \$0.20 per common share exercisable for a period of 24 months expiring November 30, 2008. The agent was also reimbursed by the Company for other agent’s expenses incurred pursuant to the offering, including legal fees of \$9,906. Until completion of the Qualifying Transaction and except as otherwise allowed by regulations, a maximum of 30% of the gross proceeds realized may be used for purposes other than evaluating businesses or assets.

On December 1, 2006, the common shares of the Company commenced trading on the Exchange under the symbol “MOS.P”.

The Company invested, on the basis of professional advice, a total of \$999,999 in Canadian asset-backed commercial paper ("ABCP") managed by Coventree Capital Group Inc. ("Coventree"). These investments are due and payable on September 26, 2007. Coventree announced in August, 2007 that it was experiencing market disruption and as a result, may be unable to meet its repayment obligations until its liquidity providers fund such repayments. The Company is currently investigating the implications of these events which appear to be a result of the current lack of liquidity for asset-backed securities rather than credit worthiness of its underlying assets.
